The problem asks to find a conditional probability of getting the sum of 5 under the condition that this sum is EITHER "5" OR "7". Notice that the events "getting the sum of 5" and "getting the sum of 7" are DISJOINT. Therefore, this conditional probability is $\frac{1}{2.5} = 0.4 = 40\%$.

We are told that at least one woman was chosen. There are two cases to consider in this conditional probability problem.

1) The committee has 1 woman and 1 man. From the 8 women, choose 1 --> 8 ways. From the 2 men, choose 1 --> 2 ways. $8 * 2 = 16$ ways. 2) The committee has 2 women. From the 8
